CONVEYORS

Common conveyor types are belt conveyors, roller conveyors, motorized roller conveyors and overhead conveyors. They can be categorized as floor conveyors (mounted on the floor) or overhead conveyors. They are used to move products, create buffers and deliver products in sequence in a production process.

Different Types of Conveyors:

- Roller conveyor.
- Gravity roller conveyor.
- Live (powered) roller conveyor.
- Chain conveyor.
- Slat conveyor.
- Flat belt conveyor.
- Troughed belt conveyor.
