

Union Special Medway

ONLINE METAL DETECTOR

When it comes to the food industry, machines such as check weighers and industrial food metal detector play a critical role in quality assurance.

At Union Special Medway, we know just how important these quality control machines are to businesses and consumers alike as they help to ensure consumer safety by checking products before they're distributed to the public. We provide weighers, food metal detectors as well as many other machines that help businesses increase the efficiency of their supply chain while also meeting all of the mandatory standards and regulations.

Our metal detectors are highly reliable and an important part of your food packaging operations. The features integral to this food metal detector include:

- Stainless Steel Construction (optional)
- Option To Stop Automatically Upon Metal Detection & Automatically Reject Container / Bags
- Flashing Light Alarm and Horn
- Accuracy up to 0.8 mm FE and 2.0 mm SS (product dependent)
- DC Variable Speed Drive
- Casters
- Modular Plastic Belt
- Multiple Product Programs
- User Friendly Remote Color Touch Pad
- Battery Back Up

Food Metal Detector Sensitivity

Our metal detection machines are highly sensitive to the presence of metal in any of the food products moving through the system within your supply chain. It enables you to control and eliminate these contaminants from polluting your entire production and packaging processes quickly and efficiently.
